

Stone Find

A button was added to make finding items by stone easier. To use:

1. Click **Inventory > Stones > Find**. The **Stones Find** window will appear.

Stones Find

General | Type & Status | Item Details | **Stones** | Scan Data | Options

Type: [Dropdown]

Min Max

Weight: [] []

Length: [] []

Width: [] []

Depth: [] []

Match Stones By Position

Primary Stone Only

Primary Or Secondary Stone

Any Stone

Organize Resulting List

One Item Per Row

One Stone Per Row

Presets... OK Cancel

2. Use the **Type** drop-down to search by a specific stone or leave blank for all stones.
3. The **Weight**, **Length**, **Width**, and **Depth** fields allow you to filter stone results by dimension. Additional options, such as **Shape**, **Clarity**, **Color**, etc will only appear when you specify a stone type.
4. Use the **Match Stones by Position** selector to choose whether to search only primary stone, primary and secondary, or all stones on an item.
5. Specify desired criteria and click **OK**. A list of matching stones will appear. This list displays one stone per row, so if an item has multiple stones it will appear multiple times.

6. You can reorder this list by clicking on any of the column headings. For example, clicking on **Weight** will sort this list by stone weight.

NOTE: This functionality was always available via Items Find by utilizing the Stones tab. The Find Stones button simply loads the preferred settings to display items by stone.
